

ALEXANDER MFONISO

Frontend Engineer 09113562352 | alexandermfoniso18@gmail.com | alexmfioniso.github.io/alexcv

BACKGROUND

Analytical and detail-driven Frontend Engineer at E-byte Africa, skilled in React, modern UI frameworks, and full-stack workflows. Known for building fast, user-focused web applications and solving complex problems with clean, scalable code. Strong ownership mindset, rapid learner, and consistently delivers high-quality digital solutions.

EXPERIENCE

Frontend Engineer E-byte Africa — *Current*

- Leading frontend development initiatives, focusing on scalable architecture and high-performance user interfaces.
- Collaborating with cross-functional teams to deliver robust digital solutions.

Web & App Development Projects

- **Music Management Platform:** Built and deployed a platform for a choir group using React, MongoDB, Tailwind, and Firebase—enabling seamless track searching, viewing, and playback.
- **Location-Based Services:** Developed advanced functionality using Mapbox and geofencing, including precise tracking, restricted access control, and multi-screen state management.
- **Surulere Day Event Website:** Created a responsive site with animated sections and dynamic pages to boost user engagement.
- **RAIDS Project:** Led the delivery of a scalable system with custom features designed for high-performance requirements and specific user workflows.

React-Forge (Open Source Project Generator) Creator & Maintainer

- Built a CLI tool that instantly scaffolds a complete React + Tailwind project, cutting setup time by 10–15 minutes.
- Engineered Node.js file-system automation, template generation, and npm package publishing.

- Implemented dynamic homepage templates based on user input and maintained active versioning and documentation.
-

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, React, React Native, Tailwind CSS
 - Backend & DevOps: Node.js, MongoDB, Python, Flask, Java, Spring Boot, Docker, Kubernetes, Jenkins
 - Tools: Git, Junit, Photoshop
-
